Cryptocurrency Intelligence Report

This comprehensive cryptocurrency intelligence report analyzes market attention and sentiment patterns for **19 digital assets** during the period **August 4-10, 2025**. The analysis combines advanced AI algorithms with multi-source data intelligence to provide strategic insights into crypto narrative momentum and digital market dynamics.

JORDN Score (Judge Of Relevance & Digital Notability)

A composite metric measuring overall market "buzz" and public attention for cryptocurrencies:

- **Talk Time:** Minutes of discussion weighted by audience reach
- **Mentions:** Raw mention count with context analysis
- **Search Trends:** Google search interest and momentum
- **Social Discussion:** Reddit and social media engagement
- **News Coverage:** Mainstream media attention and coverage

A score of 100 represents average performance. Higher JORDN scores indicate greater market attention.

RODMN Score (Controversy & Market Risk)

A sophisticated risk assessment metric measuring controversy and sentiment volatility:

- **Sentiment Volatility:** Statistical variance in public sentiment
- **Polarization Detection:** Identification of divisive market narratives
- **Risk Coefficients:** Mathematical modeling of narrative discord
- **Market Sentiment:** Bull/bear narrative analysis and momentum

Scale: 0-10. Higher RODMN scores indicate greater controversy and potential reputational risk.

Analysis Period Details

Analysis Period: August 4-10, 2025

Data Sources: 10 crypto YouTube channels, 33 episodes analyzed

Entities Tracked: 9 mainstream cryptocurrencies + 10 meme/alt coins

Content Processed: 109+ minutes, 826 entity mentions, 511k+ characters

Executive Summary

238.7

Mainstream Top Mentions

#1	Bitcoin	411.0
#2	Ethereum	216.0
#3	Cardano	44.0
#4	Solana	38.0
#5	Tether	33.0

Meme/Alt Top Mentions

#1	Official Trump	37.0
#2	Dogecoin	29.0
#3	Pepe	2.0
#4	Shiba Inu	2.0
#5	Bonk	1.0

Mainstream Google Trends

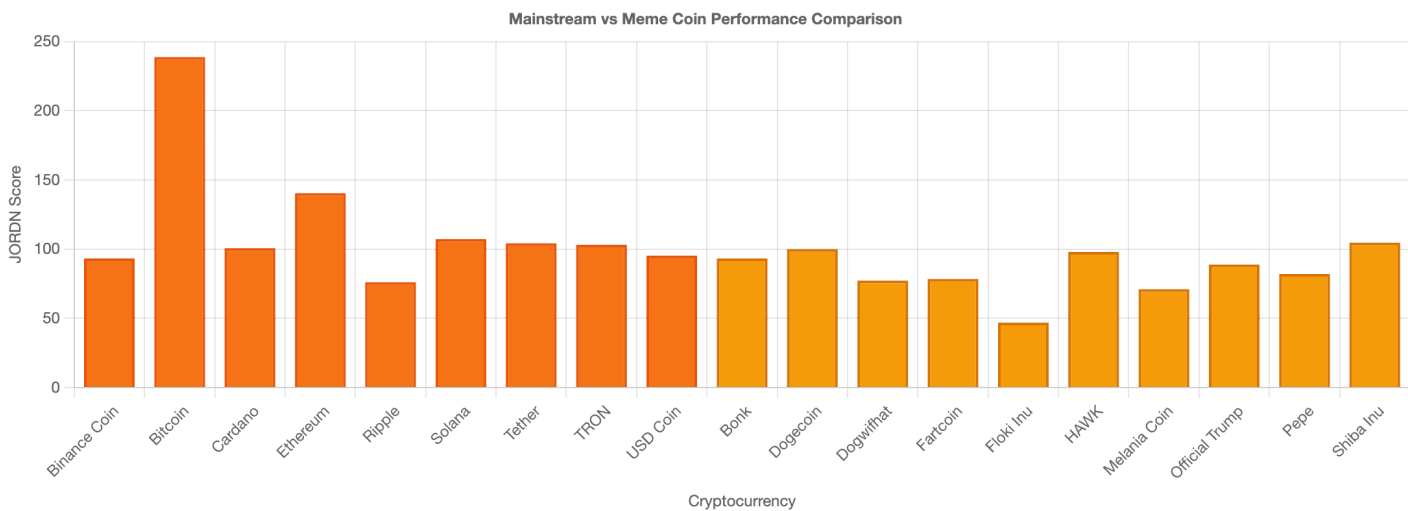

#1	TRON	100.0
#2	Solana	97.0
#3	Binance Coin	95.0
#4	Tether	95.0
#5	USD Coin	92.0

Meme/Alt Google Trends

#1	HAWK	100.0
#2	Pepe	100.0
#3	Shiba Inu	100.0
#4	Bonk	93.0
#5	Dogecoin	87.0

Mainstream vs Meme Coin Analysis

Mainstream Cryptocurrencies

Average HYPE: 117.7
Average RODMN: 4.4
Count: 9 assets

Established cryptocurrencies with institutional backing and widespread adoption. Generally show more stable attention patterns but can have high controversy during market events.

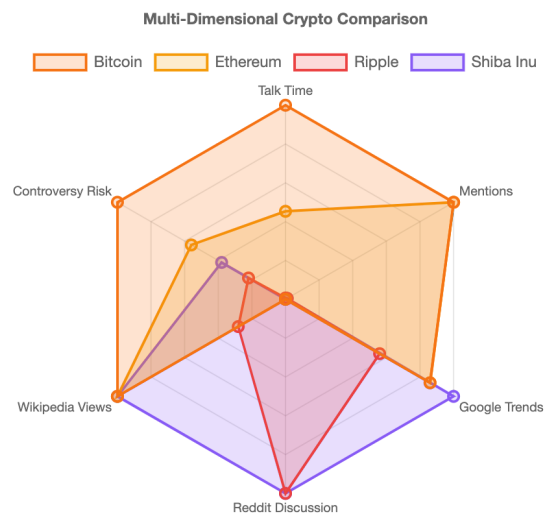

Meme & Alt Coins

Average HYPE: 84.1
Average RODMN: 2.6
Count: 10 assets

Community-driven and speculative assets often driven by social media trends. Typically show volatile attention patterns and can experience rapid narrative shifts.

Multi-Dimensional Crypto Case Study

Deep-dive analysis comparing **Bitcoin, Ethereum, Ripple, and Shiba Inu** across all key metrics. This radar visualization reveals each cryptocurrency's unique strength profile and competitive positioning across different influence channels.

Bitcoin: Market Leader

Dominates talk time and mentions, showing its position as the primary crypto narrative driver. High controversy reflects its macro-economic impact.

Ethereum: Balanced Profile

Strong across multiple metrics with particular strength in Google Trends, indicating broad mainstream interest and adoption.

Ripple: Niche Strength

Lower overall attention but consistent performance across channels, suggesting a dedicated user base and institutional focus.

Shiba Inu: Social Media Driven

Shows the meme coin pattern: strong social media presence with variable traditional metrics, driven by community engagement.

Metric Definitions

Talk Time: Minutes of discussion across crypto channels (normalized)

Google Trends: Search interest and momentum (normalized)

Wikipedia Views: Public information seeking behavior (normalized)

Mentions: Raw mention count with context analysis (normalized)

Reddit Discussion: Social media engagement volume (normalized)

Controversy Risk: RODMN narrative volatility score (0-10 scale)
